INTRODUCTION

This Plan covers the key actions and responsibilities to be followed in the event of a data breach.

State Library will follow a risk management approach to dealing with security and privacy threats. Data breaches are to be evaluated on a case-by-case basis and actions taken according to an assessment of risks and responsibilities in the particular circumstances. This document forms part of State Library's adherence to its responsibilities under privacy and other laws.

Data can be put at risk by cyberattacks, ransomware, spear phishing, malware, system and process failure, employee mistakes, deliberate misconduct, lost or stolen devices and other risks. Not every information security incident will create a privacy risk; for example, a Denial-of-Service attack may impact our functions without risking the data we hold. However, when an incident involves the potential exposure of 'personal information', it also becomes a privacy incident and possibly a notifiable 'data breach'.

OVERVIEW: THE PROCEDURE FOR ALL STAFF

What should I do if I suspect a data breach has occurred?

It is everyone's responsibility to be aware of this Plan and to report suspected data breaches as soon as possible.

<u>In all cases</u>, you must report the suspected data breach <u>immediately</u>,

either in person or by phone call, to the Privacy Officer:

Manager Information Systems & Records Management

Telephone: 92731574

You must then confirm your report in writing, by email to:

privacy@sl.nsw.gov.au

Depending on the nature of the breach, the law might consider it a 'notifiable data breach', meaning that the appropriate regulator and the affected individuals (with very few exceptions)¹ must be notified. The Privacy Officer will make an assessment about this, in accordance with the Data Breach Response Process outlined below.

mandatory-notification-data-breach-scheme-exemptions-notification-requirements

State Library Data Breach Response Plan Version 1.0 January 2024

¹ See sections 59S through 59X of the PPIP Act, and the IPC guidance at https://www.ipc.nsw.gov.au/fact-sheet-

Even if you have contained the breach (for example, retrieved a stolen laptop or lost hard-copy files), you must still tell the Privacy Officer. The Privacy Officer will assess any residual risk, and they can also consider whether further action is needed to avoid a similar occurrence.

If the Privacy Officer thinks the suspected data breach is likely to result in serious harm to any individual, they must report it <u>immediately</u> to the State Librarian.

DEFINITIONS

data breach means:

an incident in which there has been **unauthorised access to, unauthorised disclosure of, or loss of**, personal information held by (or on behalf of) the State Library`

Data breaches can be caused or exacerbated by a variety of factors, affect different types of personal information, and give rise to a range of actual or potential harms to individuals, agencies and organisations. Although there is a lot of overlap between information security incidents and data breaches, they are not exactly the same. Some cybersecurity incidents will have no impact on anyone's personal information. Some data breaches will involve only hard copy information such as paper files.

personal information means:

information or an opinion about an individual whose identity is apparent or can reasonably be ascertained from the information or opinion

We may collect personal information from the following stakeholders to carry out our functions and provide services:

- Library readers, visitors, members, customers, and subscribers
- State Library employees, contractors, and casual staff
- Vendors, suppliers, and partners
- NSW Public Libraries
- NSW Public sector agencies (includes Ministers' offices, state-owned corporations, local councils and universities)
- private sector companies
- non-government organisations
- other cultural institutions.

It can include details such as name, address, phone number, email address, date of birth, tax file numbers.

Individuals may still be identifiable even if steps have been taken to de-identify information (for example, removing direct identifiers or aggregating data). As such, it is prudent to treat de-identified information as personal information in the event of a data breach.

notifiable data breach means:

For a data breach to constitute an 'eligible data breach' under the Mandatory Notification of Data Breach Scheme, there are two tests to be satisfied:

There is an unauthorised access to, or unauthorised disclosure of, personal
information held by a public sector agency or there is a loss of personal information
held by a public sector agency in circumstances that are likely to result in
unauthorised access to, or unauthorised disclosure of, the information,

and

2. A reasonable person would conclude that the access or disclosure of the information would be likely to result in serious harm to an individual to whom the information belongs.

low risk data breach means:

A loss or exposure of aggregated data only, or of individual level data in circumstances where it is reasonably believed that no real harm could occur (e.g. paper files are left behind in a meeting but quickly retrieved).

medium risk data breach means:

A loss or exposure of personal information where it is reasonably believed that the third-party recipient does not have malicious intent, and that the data is somewhat protected (e.g. a laptop with encrypted data is left on a bus).

high risk data breach means:

It is reasonably believed that the data breach is likely to result in serious harm to one or more of the individuals to whom the information relates (e.g. external hackers breach our firewall and copy valuable reader or staff data).

What we call a 'high risk' data breach will be a 'notifiable' data breach unless it falls under one of the exceptions to the notification rules.

serious harm means:

'Serious harm' includes such things as serious physical, psychological, emotional, financial, or reputational harm. Examples of harms could include identity theft, financial loss or blackmail, threats to personal safety, loss of business or employment opportunities, humiliation, stigma, embarrassment, damage to reputation or relationships, discrimination, bullying, marginalisation, or other forms of disadvantage or exclusion.

likely to result in serious harm means:

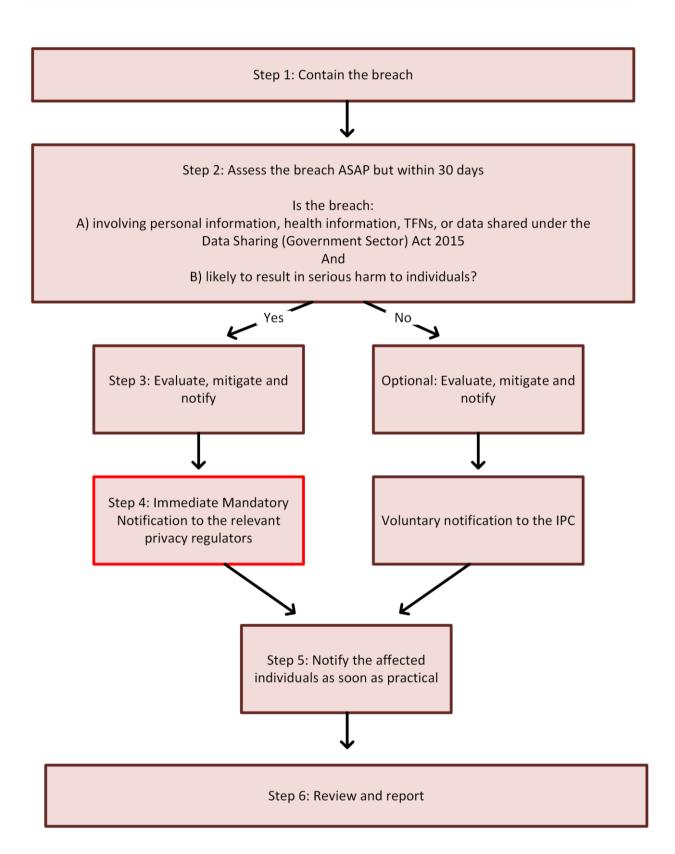

'Likely' means the risk of serious harm to an individual is more probable than not. To help assess the likelihood that an individual might suffer serious harm if their personal information was lost, or subject to unauthorised access or unauthorised disclosure, there are a number of factors to consider. See the list of factors further below, at Appendix C, in relation to assessing the likelihood of serious harm.

RESPONSE

A four-step process is set out below. It is the responsibility of the Privacy Officer to manage this process, ensure it is completed, and document the steps taken. Appendix B to this Plan provides a standard format for reporting by the Privacy Officer. If the Breach is a result of a current cyberattack this may be managed in conjunction with the Library's Cyber Incident Response Plan.

Other staff may be required to assist with the response process, by providing information, evidence, or changing technology settings. Any such action requested of you by the Privacy Officer should be carried out swiftly. Any enquiries received about any data breach should be directed to the Privacy Officer in the first instance.

OVERVIEW: THE PROCEDURE FOR THE PRIVACY OFFICER

THE DATA BREACH RESPONSE PROCESS

Step 1: Contain the breach and conduct a preliminary assessment.

 Immediately take all realistic steps to contain the breach and limit any further access or distribution of the affected personal information.

This may involve searching for and recovering the data, confirming that no copies were made or that the information was destroyed by the party receiving it, remotely wiping a lost portable device, shutting down impacted computer systems, revoking access from relevant system users, and changing passwords and system usernames. Understanding how the breach occurred will help in identifying the appropriate steps to take to contain it.

• Conduct preliminary fact-finding about the breach.

This will involve finding out the cause, risk of spread, nature of the personal information involved in the breach, options to mitigate, number and the location of the individuals affected as well as any other relevant information about the individuals involved (e.g. are some of the individuals involved known to be experiencing vulnerability, is there a risk that the individual with unauthorised access had malicious intent?).

Avoid destroying any evidence that may be necessary to investigate the breach.

• Data breaches of Library PII managed by third parties on external systems.

If the breach involves a third-party vendor/supplier, involve them as soon as possible. The Library is responsible for notifying affected individuals of the loss of their data regardless of whether the system is hosted by the Library or a third party. The conditions of this responsibility must be covered in the procurement and service contracts with our external vendors.

- If the breach is the result of a cyber-attack notify the Cyber Security Working Group to invoke the **Cyber Security Response Plan**. The investigation and mitigation of both incidents can be carried out in parallel.
- Make a preliminary assessment of the risk posed by the breach.

This will involve assessing the breach as Low, Medium or High, according to the criteria above. Document this decision using the Response Report in Appendix B to this Plan.

- For Low and Medium-rated breaches, the Privacy Officer should work with the impacted business area and any required specialists (for example Risk & Governance and ICTS) to complete the remaining steps in the Breach Response Process.
- For High-rated breaches, the Privacy Officer should activate the Breach Response Team immediately, to oversee the remainder of the Breach Response Process. Subject matter experts from the affected Branch or Division can be added to the BRT as necessary.

If a contracted service provider or other agency is involved in the data breach, consider whether it is appropriate to create a Joint Response Team.

For High-rated breaches, the Privacy Officer should also inform the COO and the Cyber Security Working Group

• Inform the State Librarian, and any relevant Executive and Managers of any data breach the breach severity and the actions to be taken.

Step 2: Evaluate and mitigate the risks associated with the breach.

• As soon as practicable, take remedial action to prevent or lessen the likelihood that the breach will result in harm to any individual.

This step may take place at the same time as the breach is being contained and assessed. Remedial action will depend on the nature of the breach but may involve recovering lost information before it is accessed, or changing access controls on customer accounts before they are accessed or unauthorised transactions can occur.

• Complete an assessment of the harm that may eventuate from the breach.

The assessment must determine whether there are reasonable grounds to believe that the data breach has resulted in, or is likely to result in, **serious harm** to one or more of the individuals to whom the information relates. The list of factors to consider in determining whether serious harm is likely to result from the breach are contained in Appendix C.

This assessment must be completed as soon as practicable and at the very latest within 30 calendar days. Ideally, the assessment should be done within 2-3 days. The assessment must be documented using the Response Report in Appendix B of this Plan.

Note it may be necessary to commence Step 3 (Notification) before the assessment has been completed or the breach is fully contained.

- For High-risk breaches, the Breach Response Team should consider whether to involve any other internal or external parties at this stage:
 - Inform the Minister
 - Inform the Library Council and the Audit & Risk Committee
 - Inform CIO DEIT
 - ID Support is a unit within the NSW Department of Customer Service, established to help customers if their government proof of identity credentials are stolen or fraudulently

obtained.² ID Support can offer a rapid-fire response, including liaison with Cyber Security NSW,³ law enforcement agencies and others (such as IDCare), convening a whole-of-government steering committee if required, and helping us to identify and notify affected individuals.

- For cybersecurity incidents requiring support or assistance, contact Cyber Security NSW, and/or the Australian Cyber Security Centre.⁴
- For other types of criminal activity (e.g. theft), contact the local police.

Step 3: Notify and communicate.

- Notification is required by law under the PPIP Act if personal information and/or health
 information was involved, and the assessment has concluded that there are reasonable
 grounds to believe that the data breach has resulted in or is likely to result in serious harm
 to one or more of the individuals to whom the information relates (i.e. what we describe as a
 High-Risk breach).
- Notification is required by law under the federal Privacy Act if TFNs were involved and the
 assessment has concluded that there are reasonable grounds to believe that the data breach
 has resulted in or is likely to result in serious harm to one or more of the individuals to
 whom the information relates (i.e. what we describe as a High-Risk breach).
- Notification is also required by law if the data involved was received from another agency or the NSW Data Analytics Centre under the <u>Data Sharing (Government Sector) Act 2015</u> and we have become aware that privacy legislation has been (or is likely to have been) breached in relation to that data, while the data was in State Library control; in such a case, our mandatory obligation is to inform the data provider and the NSW Privacy Commissioner, while informing any affected individuals is voluntary.
- Notification is voluntary in all other cases (i.e. Low Risk and other Medium Risk breaches).
 Consider the reasonable expectations of the individuals concerned, as well as our reputation if we do or don't notify. If we choose to voluntarily notify affected individuals, we do not need to notify the regulator, though it is best practice to do so nonetheless.
- Mandatory notification requires the Privacy Officer to prepare a statement in conjunction with the Manager Media & Communications for approval by the State Librarian:

² https://www.nsw.gov.au/id-support-nsw

³ https://www.digital.nsw.gov.au/policy/cyber-security

⁴ https://www.cyber.gov.au/

- In relation to a data breach involving personal information and/or health information, the statement must be sent to the NSW Privacy Commissioner (part of the NSW IPC) immediately. The IPC can be contacted via email to ipcinfo@ipc.nsw.gov.au, or by telephone on 1800 472 679. The Response Report in Appendix B to this Plan includes the information you will need to report to the IPC under s.59M of the PPIP Act. Copy the relevant details into the IPC's approved form (see here), which must be completed unless it is not reasonably practicable. Also see Appendix D for all matters that must be included in the statement to the IPC.
- In relation to a data breach involving TFNs, the statement must be sent to the Australian Privacy Commissioner (part of the Office of the Australian Information Commissioner, or OAIC) as soon as practicable. The OAIC has an electronic form for reporting data breaches; see here. The Response Report in Appendix B to this Plan contains the information needed to complete the OAIC's electronic form. The OAIC can also be contacted by telephone on 1300 363 992.
- In relation to a data breach involving data received under the Data Sharing (Government Sector) Act, the statement must be sent to the data provider and the NSW Privacy Commissioner (part of the NSW IPC) as soon as practicable. The IPC can be contacted via email to ipcinfo@ipc.nsw.gov.au, or by telephone on 1800 472 679.
- The statement must also be provided directly to affected individuals as soon as practicable. See further information below about how to do this, under 'How to notify individuals'. NOTE: Where police or another law enforcement agency is investigating the breach, they must be consulted first, before making details of the breach public. There are limited exceptions to the requirement to notify individuals, such as if notification would prejudice an investigation or court proceedings, breach a secrecy provision, or create a serious risk of harm.⁵
- If the data breach involves a contracted service provider, funded NGO or other agencies, a joint notification should be made on behalf of all organisations, by the organisation with the closest relationship to the affected individuals.⁶

⁵ See sections 59S through 59X of the PPIP Act, and guidance from the IPC at https://www.ipc.nsw.gov.au/fact-sheet-mandatory-notification-data-breach-scheme-exemptions-notification-requirements.

⁶ The notifiable data breach scheme applies if the data involved in the breach was held directly by our agency, or if it was held on our behalf by a contracted service provider such that our agency was still in 'control' of the data; see s.59C of the PPIP Act, compared with s.4(4).

■ Refer to the sample notification wording at Appendix E to this Plan, to assist in drafting the above statement.

If the data breach involves TFNs, a serious or repeated failure to comply with the notification requirements under the federal Privacy Act could make State Library liable for penalties of up to \$50M.

- Consider what staff should be told about the breach, to help contain the breach and prevent
 further breaches. Staff should be provided with instructions on any immediate action to be
 taken, such as not clicking on emails with attachments, and being aware of phishing attacks.
 Messaging should include that staff must not comment publicly or privately (including on
 social media), that any media communications must be handled by the Manager Media &
 Communications supporting the Breach Response Team, and that all other enquiries must be
 referred to the Privacy Officer.
- Work with the Manager Media & Communications supporting the Breach Response Team to provide advice to customer-facing teams about handling enquiries from customers. A set of prepared FAQs can assist.
- A proactive media/social media/communications response should also be developed with the support of the Manager Media & Communications supporting the Breach Response Team. Prepare FAQs for internal and external audiences. By publishing the State Library's stated position early, we demonstrate our transparency and commitment to resolving this matter.
- Depending on the number of individuals affected, we may set up a dedicated webpage, and/or telephone line.
- If there is a risk that the personal information could be used for identity theft or other types
 of fraud, we should engage with IDCARE, the National Identity & Cyber Support Service, on
 1800 595 170, or via www.idcare.org. IDCARE can offer us advice and can also assist affected
 individuals.
- There may be others we should contact, such as our insurance company, professional or
 other regulatory bodies, credit card companies, financial institutions or credit reporting
 agencies, other internal or external parties, such as third-party contractors, or outsourcing
 agencies. Also consider groups that represent the affected individuals, such as the relevant
 union if data about staff was compromised.
- In some cases, we may need to consider offering compensation. Consult the Legal Counsel assisting the Breach Response Team before making any suggestions or offers to affected individuals.

Step 4: Prevent future breaches.

- For any High Risk or Medium Risk breaches the Privacy Officer must submit a report within 10 working days to the Breach Response Team and State Librarian outlining the organisational response and mitigation plan. Regular updates may also be expected as matters unfold.
- High-risk breaches must be added to the State Library internal register of eligible (i.e. notifiable/high-risk) data breaches.⁷
- Mitigation steps must address the identified root cause of the breach. Mitigation may include:
 - a security audit and any modifications to physical controls such as locks, alarms, visitor access control,
 - o review of policies and procedures including the privacy management framework,
 - o review of employee training and selection practices,
 - o a review of suppliers and third parties, updating passwords, or altered deployments of technology.
- A review of the process used for this breach, after it has been handled, should be conducted, reported to the Breach Response Team and State Librarian with details of any recommendations, and saved for future reference.
- Appropriate records must be maintained, to provide evidence of how suspected and actual
 breaches are managed, including Low, Medium and High-Risk breaches. Tracking data
 breaches allows the State Library to monitor, analyse and review the type and severity of
 suspected and actual breaches. Conduct an annual review of our breach response records, to
 help identify and remedy: (i) weaknesses in security or processes that are prone to error, and
 (ii) any deficiencies in our response procedure that impact on its effectiveness.

⁷ Section 59ZE of the PPIP Act.

HOW TO NOTIFY INDIVIDUALS

There are three options for notifying individuals at risk of serious harm, depending on what is 'practicable':

- 1. Directly notify only those individuals at risk of serious harm, or
- 2. Directly notify all individuals whose data was breached, or
- 3. Publicise the statement more broadly.

ID Support NSW can assist us to identify and notify affected individuals.

Where it is possible to identify and contact only those individuals at risk of serious harm, State Library must directly notify those individuals. We might also publish the notification more broadly, including on our website.

Where it is not possible to identify which individuals might be at risk of serious harm, but it is possible for us to directly contact all individuals whose data was breached, then State Library will directly notify all individuals whose data was breached. We might also publish the notification more broadly, including on our website.

Where it is not reasonably practicable to identify which individuals might be at risk of serious harm, and it is not practicable to directly contact all individuals whose data was breached (for example, if we don't have up-to-date contact details for old customers), then we must publish a notification on our website, in a 'public notification register'. We must also take reasonable steps to publicise that notification, for example we should consider other methods of communication such as social media, or advertisements in newspapers.

Where appropriate, social media will be used to provide information about the investigation, any updates and what further action individuals may take and what steps State Library is taking to prevent any future data breaches. A media response should also be considered.

State Library Data Breach Response Plan Version 1.0 January 2024

⁸ See section 59P of the PPIP Act. Our 'public notification register' must be available for at least 12 months, and we must inform the IPC about it.

APPENDIX A: DATA BREACH RESPONSE TEAM CONTACT INFORMATION

Title Email Phone Name Manager, Information Systems & Records Kate Curr privacy@sl.nsw.gov.au Management & Privacy Officer Legal counsel (as required) Director DXD & CIO Robin Phua Robin.phua@sl.nsw.gov.au Manager, ICT Services Saraj Mughal Saraj.mughal@sl.nsw.gov.au Governance and Risk Specialist Richard Knox Richard.Knox@sl.nsw.gov.au Vanessa.Bond@sl.nsw.gov.au Manager, Media & Communications Vanessa Bond Rebecca.Acton@sl.nsw.gov.au Head of People and Culture Rebecca Acton

APPENDIX B: DATA BREACH RESPONSE REPORT

(Note: The content of any report to the NSW IPC must include those matters set out at s.59M of the PPIP Act; see also Appendix D below. When reporting to the IPC, copy the relevant details from this report into the IPC's approved form (see here), which must be completed unless it is not reasonably practicable.)

1.	1. Contain and assess				
	1.1	When did the Data Breach occur (if known)?			
	1.2	When, where, how and by whom was the Data Breach first discovered?			
		(How long was the information exposed?)			
	1.3	When, how and by whom was the Data Breach first reported to the Privacy Officer?			
	1.4	What was the primary cause of the Data Breach?			
		Malicious or criminal attack			
		System fault			
		Human error			

State Library Data Breach Response Plan

1.5	Outline the nature of the Data Breach as first reported to the Privacy Officer:				
Type of breach: Unauthorised access / Unauthorised disclosure / Loss / Alteration / Destruction of personal information					
Cause of breach / how it occurred (provide a brief explanation)					
	• Type of data affected: Financial information / Identity documents, credentials, and/or Government identifiers (e.g. Medicare, driver licence or passport numbers) / Tax File Numbers / Health information (including information about genetics or disability) / 'Sensitive information' (ethnic or racial origin, political opinions, religious or philosophical beliefs, trade union membership or sexual activities) / Contact information (e.g. home address, phone number or email address) / Other types of personal information				
	Type of individuals affected				
Number of individuals affected (provide best estimate if figure if unknown					
1.6	What steps were immediately taken to contain the Data Breach?				
1.7	Who has been drafted into the Breach Response Team? (Include both internal and external stakeholders. Include the date the Breach Response Team was activated.)				
1.8	Outline the results of the preliminary fact-finding, about:				
	Type of breach: Unauthorised access / Unauthorised disclosure / Loss / Alteration / Destruction of personal information				
	Cause of breach / how it occurred				
	Type of cause: Cyber incident / Human error / Loss or theft of data or equipment / System fault / Other				
	If the breach was a cyber incident, provide details: Ransomware / Malware / Compromised credentials from phishing / Compromised credentials from brute force attack / Compromised credentials method unknown / Hacking / Other				
	A description of the data involved in the breach				

	Type of individuals affected					
	Location of individuals affected (e.g. whether any are in the EU)					
	Number of individuals affected					
Any other entity involved (e.g. a contracted service provider, other public sector agency or other type of third party)						
	Options to mitigate risk					
1.9	What is the preliminary view as to the level of risk posed by the data breach?					
	High Risk (established) = likely to result in serious harm to affected individual/s					
	High Risk (suspected/possible, needs further investigation)					
	Medium Risk					
	• Low Risk					
1.10	Have any external parties been notified about the breach? E.g. our insurer; ID Support NSW; Cyber Security NSW; Australian Cyber Security Centre; police; other. (Include date and details.)					
2. Eva	luate and Mitigate					
2.1	Who has now been drafted into the Breach Response Team? (Include internal and external stakeholders and when they were included.)					
2.2	Remedial action: What steps have been taken to contain the Data Breach?					

20

2.3	Remedial action: What steps have been / will be taken to minimise the effect on potentially affected individuals?			
2.4	What steps have been / will be taken to prevent reoccurrence? (Consider here whether any similar breaches have occurred in the pass			
2.5	Concluding the assessment: What is the Breach Response Team's conclusion as to the level of risk posed by the data breach? (Include supporting reasons.)			
	High Risk = likely to result in serious harm to affected individual/s			
	Medium Risk			
	• Low Risk			
3. Not	ify and communicate			
3. Not	ify and communicate Decision taken in relation to notification? (Include supporting reasons.)			
	Decision taken in relation to notification? (Include supporting reasons.)			
	Decision taken in relation to notification? (Include supporting reasons.) • Mandatory (all High Risk breaches)			
	Decision taken in relation to notification? (Include supporting reasons.) Mandatory (all High Risk breaches) Voluntary (optional for all other Medium Risk breaches) No notification (Low Risk breaches)			
3.1	Decision taken in relation to notification? (Include supporting reasons.) Mandatory (all High Risk breaches) Voluntary (optional for all other Medium Risk breaches)			

3.4	If TFNs were included: Statement provided to the Australian Privacy Commissioner (OAIC)? (Include date statement made, how lodged. Attach a copy to this report.)
3.6	What notification method/s have been followed for notifying affected individuals? • Direct to only individual/s at risk of serious harm • Direct to all individuals whose data was breached
	 Indirect via our website (mandatory if neither of the above is possible) Indirect via other channels e.g. social media (an optional extra, in addition to one of the three methods above)
3.7	Notification made to affected individual/s? (Include date notification/s made, number of individuals notified, how many yet to be notified, how communicated.) Detail the contents of the notification, including what recommendations were made about the steps individuals could take to mitigate the effects of the breach; and whether they were advised of the complaints / internal review processes available to them under the PPIP Act. Attach a copy to this report.
3.8	Estimated cost of the breach to the agency?
4. Re	view and prevent
4.1	What has been done to prevent a recurrence of this Data Breach?
4.2	Organisational response and mitigation plan. The following changes are recommended to our:

information security protocols
 physical security controls
 policies, plans or procedures
 staff training / other

4.3 Recommended plan to review / audit to ensure the above corrective actions are implemented

APPENDIX C: FACTORS TO CONSIDER IN ASSESSING SERIOUS HARM

The assessment about the likelihood of serious harm should have regard to:

- the type of information involved: e.g. was it name and address, financial, health, criminal records, evidence of identity documents or other unique identifiers, biometrics, other types of 'sensitive information' such as information about a person's ethnicity, religion or sexuality? ('Sensitive information' is defined at s.19(1) of the PPIP Act.)
- the volume of information involved: was it a combination of pieces of data about the individual which would not otherwise be known?
- the number of individuals affected: e.g. is there a risk that due to the number of people impacted, there is a higher chance that someone in the cohort may experience serious harm as a result of the breach?
- whether the information is protected by one or more security measures: e.g. what is the likelihood that any of the security measures could be overcome?
- the risk profile of the information involved: e.g. could it be used for identity theft or other fraudulent purposes? to humiliate or blackmail the individual? to commit physical harm?
- the type of individuals affected: e.g. are the individuals experiencing vulnerability (e.g. victims of family violence), or are the individuals involved worth targeting in some way (e.g. very wealthy people or public figures)?
- how much time passed between becoming aware of the data breach and containing it?
- the context: was this an isolated incident, a systemic problem, a deliberate attempt to steal data, or the result of an accident or other unintentional behaviour?
- how likely is it, that the persons who may have obtained the information have an intention to cause harm to any of the individuals affected by the data breach?
- the further effects: is there a risk of ongoing breaches or further exposure of the information?
- the risk of cumulative harm: have there been breaches in other organisations that could result in a *cumulative* effect of more serious harm?
- the extent to which the risk has been successfully prevented or lessened by any remedial action or containment efforts: e.g. was the data encrypted, was the portable storage device remotely wiped, were the hard copy files quickly recovered?
- given all of the above, the type of harm likely to affect the individuals: e.g. identity theft, financial loss, threat to physical safety, threat to emotional wellbeing, loss of job opportunities, humiliation, damage to reputation or relationships, workplace or social bullying or marginalisation.

APPENDIX D: CONTENTS OF MANDATORY NOTIFICATION STATEMENT

The mandatory notification statement to impacted individuals must set out:9

- the date the breach occurred,
- a description of the breach,
- how the breach occurred,
- the type of breach that occurred (i.e. unauthorised disclosure, unauthorised access, loss of information)
- the personal information that was the subject of the breach,
- the amount of time the personal information was disclosed for,
- actions that have been taken or are planned to ensure the personal information is secure, or to control or mitigate the harm done to the individual,
- recommendations about the steps the individual should take in response to the data breach (e.g. link to www.idcare.org if the breach suggests we need to assist individuals to protect against identity theft),
- information about making of privacy related complaints and internal reviews of certain conduct of public sector agencies,
- the name and contact details of the public sector agency the subject of the breach,
 if more than 1 public sector agency was the subject of the breach, the name of each other

The mandatory notification statement to the IPC must use the approved form, and must set out:10

- the information provided to impacted individuals (as set out above),
- a description of the personal information that was the subject of the breach,
- whether the head of the agency is reporting on behalf of other agencies involved in the same breach,

agency.

07/Form Data Breach Notification to the Privacy Commissioner July 2023.pdf.

⁹ s.590 PPIP Act.

¹⁰ S.59M(2) PPIP Act; see also the template form at https://www.ipc.nsw.gov.au/sites/default/files/2023-

- if the head of the agency is reporting on behalf of other agencies involved in the same breach, the details of the other agencies,
- whether the breach is a cyber incident,
- if the breach is a cyber incident, details of the cyber incident,
- the estimated cost of the breach to the agency,
- the total number, or estimated total number, of individuals affected or likely to be affected by the breach, and notified of the breach,
- whether the individuals notified have been advised of the complaints and internal review procedures under the PPIP Act.

APPENDIX E: SAMPLE WORDING OF STATEMENT

State Library data breach notification

(Note: The content of a notification to any individual must fulfill the requirements of s.590 of the PPIP Act.)

Dear <NAME-OF-AFFECTED-INDIVIDUAL>

We are contacting you to notify you of an incident of <strike out any of the following if not applicable> unauthorised access to, unauthorised disclosure of, or loss of, personal information held by State Library of NSW.

Security is very important in our operations and the nature of this breach is unusual. Staff at State Library responded quickly.

On <DATE>, the State Library became aware that <EXPLANATION-OF-DATA-BREACH (e.g. an error which allowed a database containing a certain type of data to be accessed by an unauthorised person, or a file containing X number of records which included the personal information of Y number of customers was accessed / disclosed / lost by our third party contractor Z)>.

We are working with the Office of the NSW/Australian Privacy Commissioner strike out NSW or Australian as appropriate; the Australian Privacy Commissioner would only be involved if the data breach involved TFNs>, keeping them aware of our efforts to contain the breach and prevent any future similar error from occurring. "> keeping them aware of our efforts to contain the breach and prevent any future similar error from occurring.

The personal details <accessed/disclosed/lost> included <WHAT-PERSONAL-INFORMATION (e.g. names, addresses, dates of birth etc); also outline here how long the information was available if lost or disclosed, and the potential or likely consequences)>.

We want to reassure you that CDETAILS-OF-ANY-ASSURANCE (e.g. no passwords, credit card
details or bank account details were accessed, disclosed or lost; or no records have been affected or
altered in this data breach, so the accuracy of the information we hold about you is unaffected)>.

We are incredibly sorry to our TYPE OF INDIVIDUALS e.g. patients, customers, business contacts. We are deeply disappointed this could happen. We take full responsibility and are doing everything to not only right this, but to prevent it from happening again.

State Library is endeavouring to contact all people who are affected by this data breach and inform them of how to further protect their information. We advise you to WHAT-THEY-SHOULD-DO (e.g. change the password you use when dealing with us, and on any other sites where you use the same password; be vigilant reviewing any transactions you have made through our system; review current records / orders; scrutinise emails for suspicious links; cancel credit/debit cards; utilise two-factor authentication for online banking and other important online accounts; check your credit history and put a ban on it to prevent any new accounts being opened) and contact us if you are concerned.

<IF IDENTITY THEFT IS A RISK BUT CUSTOMERS NEED TO MANAGE THIS THEMSELVES (NOT RECOMMENDED)> To protect yourself from identity theft, you can also contact IDCARE, the National Identity & Cyber Support Service, on 1800 595 160, or via www.idcare.org.

<IF IDENTITY THEFT IS A RISK AND IDCARE SERVICES WILL BE PROVIDED> To protect yourself from identity theft, you can also contact IDCARE, the National Identity & Cyber Support Service, on 1800 595 160, or via www.idcare.org. IDCARE's services are at no cost to you if you quote reference number <XXXXXX>.

State Library has taken action to secure the information by <WHAT WE ARE DOING (e.g. specify the steps and measures taken to contain the breach, investigate, notify and prevent future data breaches of a similar kind from occurring. This might include employing security experts, carrying out an audit, increasing security and access settings, providing training to staff, or updating policies)>.

<IF THIS IS NECESSARY> We have set up a designated website to keep you informed; see
<www.WEB-PAGE-URL>

An officer has also been specifically assigned to answer questions about this data breach and to provide more information, if required.

Contact: <NAME-OF-DESIGNATED-STAFF-MEMBER>

Phone: <13 XX XX>

Email: <xx@xx>

<Keep this paragraph if TFNs were involved, otherwise delete> If you are not satisfied with the actions taken by State Library you can lodge a complaint with the Office of the Australian Information Commissioner (OAIC). The OAIC can be contacted in a number of ways:

Phone: 1300 363 992

Email: enquiries@oaic.gov.au

Post: GPO Box 5218; SYDNEY NSW 2001

Website: www.oaic.gov.au

<For all other data breaches, except TFNs> If you are not satisfied with the actions taken by State Library, you can lodge a complaint with the NSW Privacy Commissioner at the Information and Privacy Commission (IPC). The IPC can be contacted at:

Freecall: 1800 472 679

Email: <u>ipcinfo@ipc.nsw.gov.au</u>

Post: GPO Box 7011, Sydney NSW 2001

Website: www.ipc.nsw.gov.au

If you believe that State Library has breached any of the privacy principles in the *Privacy* and *Personal Information Protection Act 1998* (NSW) or the *Health Records and Information Privacy Act 2002* (NSW), you can seek an internal review of our conduct. To seek an internal review please write to:

Caroline Butler-Bowden
