British Colonisation
Primary sources and compelling stories will immerse students in the European exploration and colonisation of Australia.

Art Around the Library
An expert visual arts educator will take you behind the scenes and into the extraordinary picture store of the State Library in this acclaimed five-part series. Students will develop their art-making skills in interactive workshops covering drawing, painting, collage and 3D modelling.

Research Skills for HSC Students
Tailored to individual subject areas, this program will assist senior students to navigate the resources available through the State Library website.

Personal Stories from WW1
The State Library's unique collection of WW1 diaries affords a rare insight into the personal experiences of Australian soldiers. Expert curators will unravel the stories and introduce students to the men who carefully recorded their wartime experiences.

Mapping with Matthew Flinders
The map of Australia is the work of Matthew Flinders but how well do we know this important explorer?

Come on a journey of discovery as we circumnavigate Australia with Matthew Flinders and his cat Trim. Retrace his journey and hunt for treasure along the way in this interactive experience.
