

Activity 2: Acquiring and representing geographical information – features of beaches

Image 1 is a labelled image of natural features of a beach. Discuss with students what natural features are and how they differ from human features. (Human features are managed by people or built by people.)

Image 2 is a labelled image of human features associated with beaches. Discuss with students the reasons why people build these features at beaches and how they are used.

Image 3 is a line drawing of this image. Students use the information in Images 1 and 2 to colour and draw in the natural features and human features found at the beach.
