

### Activity 5: Communicating – Weather role play

Students pretend to get dressed in one of the clothing items in Source 10. They role play an activity they would be doing dressed in that clothing item and then state what kind of weather they are experiencing.

In small groups, students role play activities they can do in each type of weather called as indicated by the teacher. The teacher states a change in the weather and students change clothing and activities.

A box of dress ups, props and 1m<sup>2</sup> fabric squares (use as scarves, beach towels, raincoat, etc) would enhance this activity. A4 images of weather symbols could be used to signify weather changes.
